

## ACTIVITIES

Here you can find all Universe Awareness activities, created so that you can use the wonders of the cosmos to inspire and educate young children in your local area!

### Dr. Seahorse Sees Spots

Dr. Seahorse examines the freckles on the Sun. Freckles? Well, they're called sunspots. Take a look in [this](#) activity!

## SPACE SCOOP

Bringing news from across the Universe to children all around the world.

### Interstellar Snowball

## Fight Seen for the First Time!

Occasionally a comet makes the newspaper headlines when it makes a dazzling light show across our night sky. This gives the impression that comets are rare. However, that's far from the truth! [Read more](#)

## Baby Stars Caught In A Galactic Spider Web

In the very beginning of the Universe, after the Big Bang, gravity began pulling together tiny particles to make stars. Millions and billions of stars were bound by gravity into groups that we call galaxies. And gravity even confines galaxies together in packs that we call 'galaxy clusters'. [Read more](#)

## Flock of Space Ducks Caught on Camera!

Have you ever been lucky enough to see a flock of ducks getting ready to fly to warmer climates for the winter? Sailing gracefully as a group, from one fascinating pattern to the next? Normally these ducks are spotted soaring 1000 feet above the ground (about the height of the Eiffel Tower!) [Read more](#)

## NEWS

Read about the latest Universe Awareness activities taking place around the world!

## Pilot Project: Professional Telescopes for High Schools

UNAWE and TEMI Netherlands set up a series of astronomy masterclasses in collaboration with secondary school Montaignelyceum in The Hague, The Netherlands. The first edition consists of six classes and are themed 'exoplanets'.
